

HOW TO START YOUR OWN HERB GARDEN

EASY TO FOLLOW
GUIDE ON HOW TO
START A BASIC
HERB GARDEN

MATERIALS

You Will Need:

- Herb seeds of your choice.
- Plant pot, you can substitute this for an old coffee jar.
- Potting Mix

You Might Also Want: (For making tags)

- Marker
- Cardboard
- Scissors

METHOD

1.

First off you want to prepare whatever you are going to plant your herbs in and fill with potting mix. If you want a cardboard tag to label your herbs, cut a piece of cardboard to a size of your liking, name it and place at the back of your pot.

2.

Next, you will want to plant the seeds according to what the packet says, some will say plant in the soil where some may say to keep above the soil.

3.

After planting you will want to water the seeds in, if you have chose something like a coffee jar to plant in make sure not to use too much water as it cannot drain.

4.

Finally, you will need to pick somewhere to place your plants, this can be indoors or outdoors however outdoors isn't recommended if you chose a coffee jar as the glass will get very dirty. A good place to put the plants is somewhere where the plant will get around 6 hours of sunlight, also you should turn the pot every few days as plants grow towards sunlight.

SUMMARY

This is a great little project that can keep you and your family busy during lockdown that requires very little materials to get started, and you may really come to appreciate if your family enjoy cooking homemade meals.
